EXPERIMENT NO:02

Experiment 2: Mobile Station UI Prototype Using Figma

1. Aim

To design a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

2. Requirements

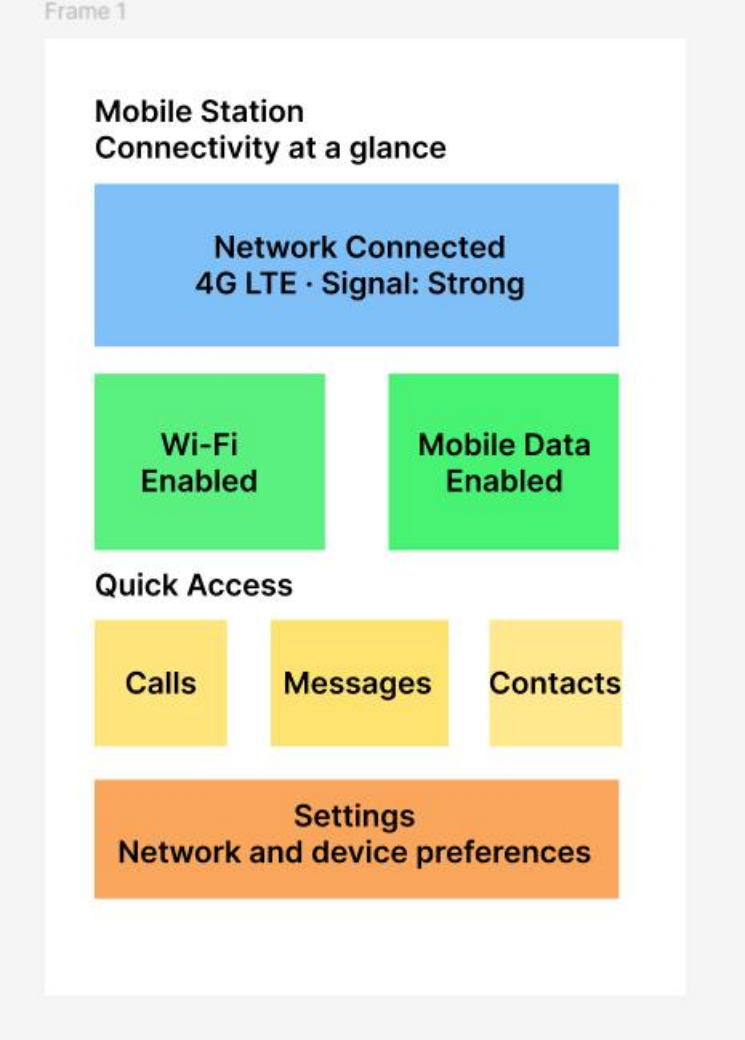

- Figma
- Web browser
- Internet connection

3. Procedure

1. Open Figma and create a new design file.
2. Select the Frame tool (F) and choose a mobile phone frame.
3. Add a title at the top: Mobile Station.
4. Design the following elements:
    - Network signal strength indicator
    - Battery percentage
    - Wi-Fi and mobile data buttons
    - Call and message icons
    - Contacts section
    - Settings button
5. Use rectangles, text and icons to create the interface.
6. Apply suitable colours and arrange the elements neatly.
7. Open the Prototype tab and connect the buttons to other frames.
8. Click Present to test the prototype.

4. Output

A mobile station interface displaying network connectivity, signal strength, Wi-Fi, mobile data, calls, messages, contacts and settings.

5. Result

Thus, a mobile station UI prototype considering connectivity and user convenience was designed using Figma.
