EXPERIMENT NO:03

Experiment 3: Network Switching Subsystem (NSS) Flowchart Using Figma

1. Aim

To develop a flowchart in Figma depicting the operation of the Network Switching Subsystem (NSS) in a mobile cellular system.

2. Requirements

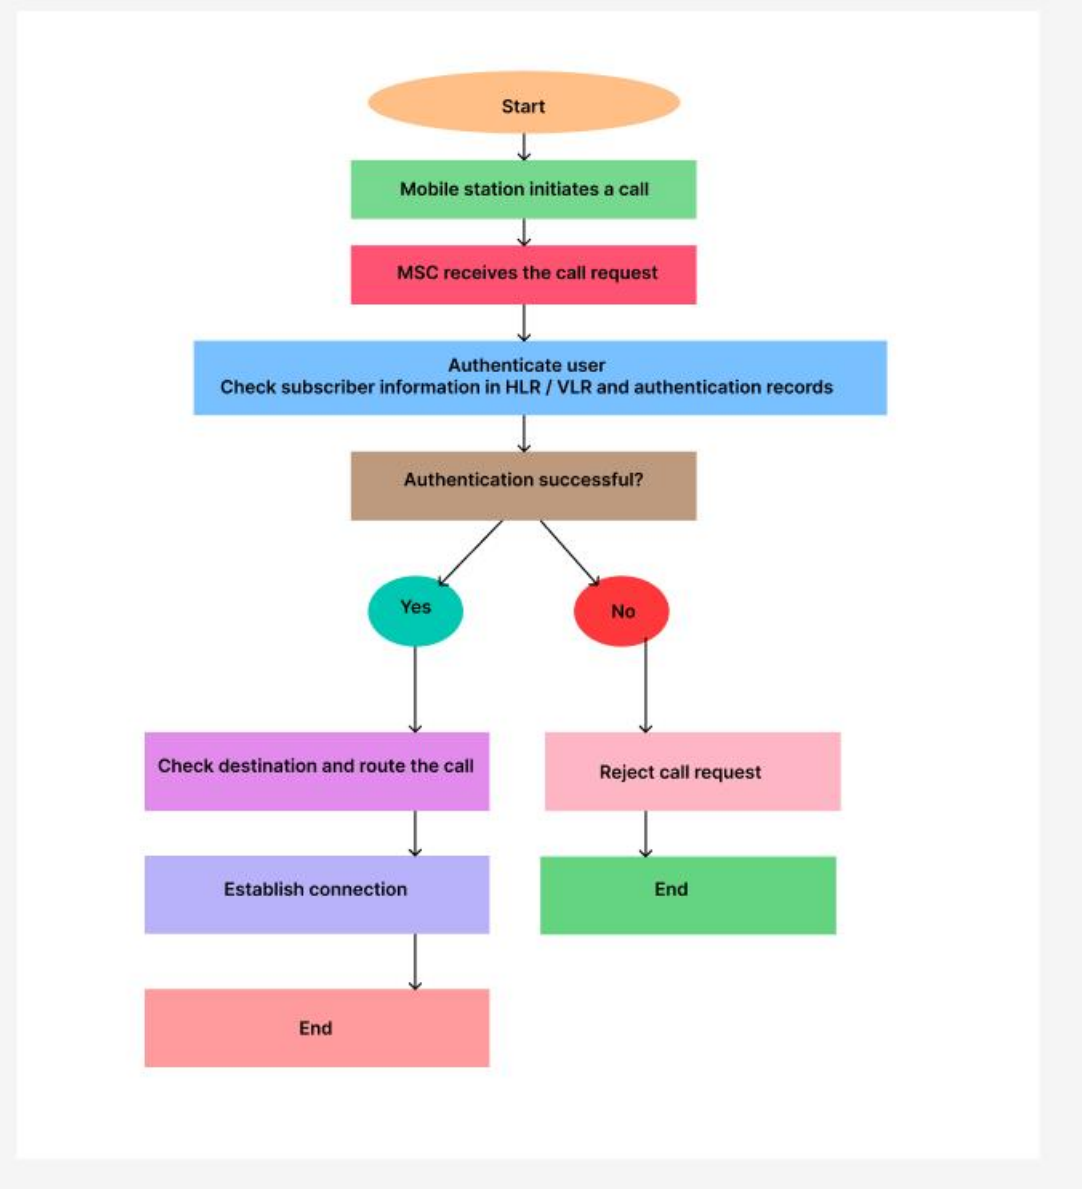

- Figma
- Web browser
- Internet connection

3. Procedure

1. Open Figma and create a new design file.
2. Select the Frame tool (F) and create a workspace.
3. Add the heading Operation of Network Switching Subsystem (NSS).
4. Use the following flowchart shapes:
    - Oval for Start and End.
    - Rectangle for processing steps.
    - Diamond for decision-making.
    - Arrows to connect the steps.
5. Arrange the shapes in the correct sequence.
6. Add labels to the decision branches, such as Yes and No.
7. Use different colours for processing and decision steps.
8. Open the Prototype tab to connect frames if you want to make the flowchart interactive.
9. Click Present to test the prototype.

4. Output

The flowchart illustrates how the NSS receives a call request, authenticates the subscriber, checks routing information and establishes the connection or rejects the request.

5. Result

Thus, the operation of the Network Switching Subsystem in a mobile cellular system was represented using a flowchart in Figma.
