EXPERIMENT NO:10

Experiment 10: Multiple Access Techniques Using Figma

1. Aim

To create a visual representation in Figma showing the differences between various multiple access techniques.

2. Requirements

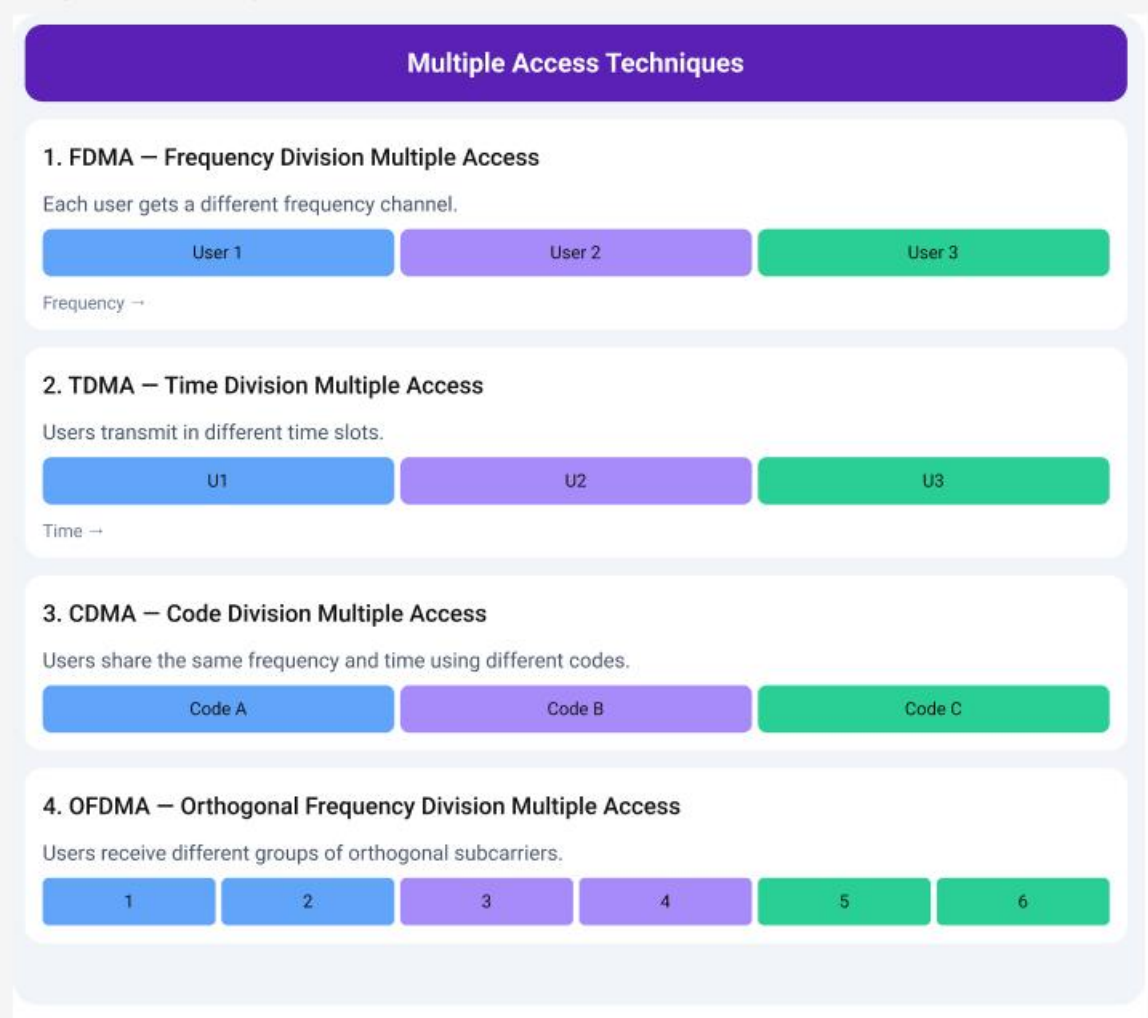

- Figma
- Web browser
- Internet connection

3. Procedure

1. Open Figma and create a new design file.
2. Press F and select a desktop frame.
3. Add the heading Multiple Access Techniques.
4. Create four sections for FDMA, TDMA, CDMA and OFDMA.
5. Draw simple diagrams showing how users share the communication channel.
6. Add a short description below each diagram.
7. Use different colours to represent different users.
8. Arrange the four sections neatly and click Present to view the design.

4. Output

A visual comparison of FDMA, TDMA, CDMA and OFDMA, showing how each technique allows multiple users to share communication resources.

5. Result

Thus, a visual representation of different multiple access techniques was created using Figma.
