EXPERIMENT NO:06

Experiment 6: Handoff Scenario in a Mobile Network Using Figma

1. Aim

To simulate a handoff scenario in a mobile network and visualize the process using Figma.

2. Requirements

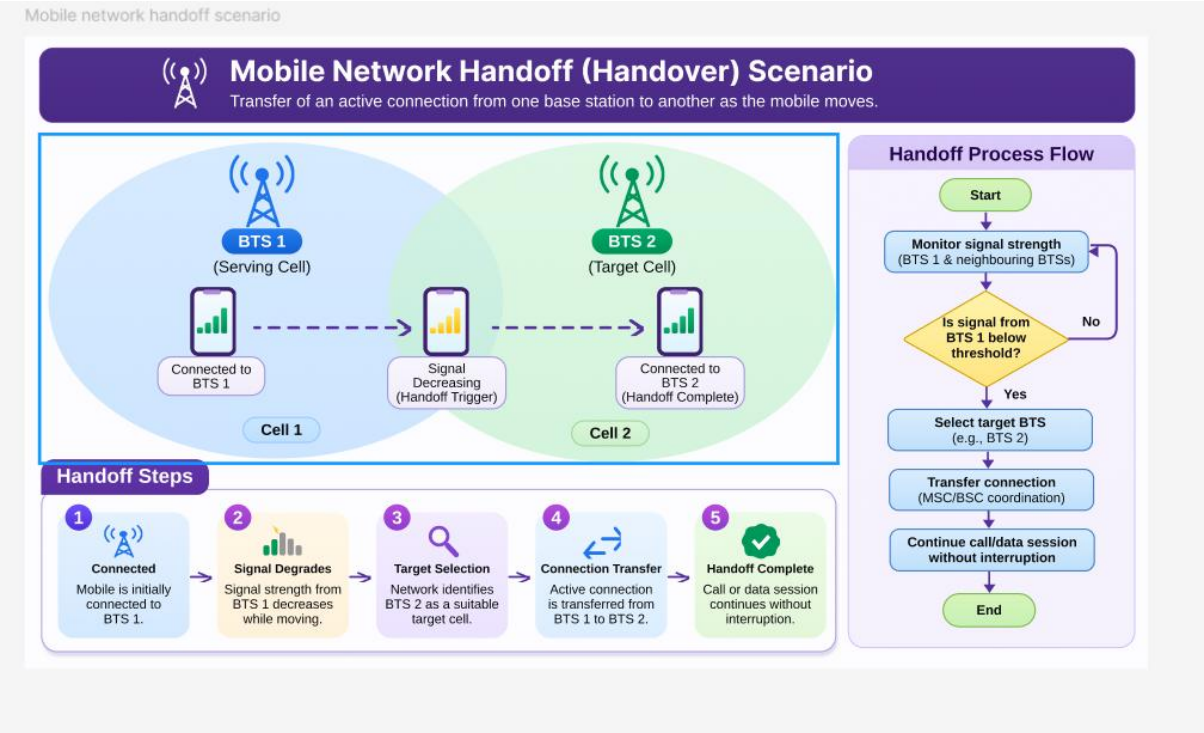

- Figma
- Web browser
- Internet connection

3. Procedure

1. Open Figma and create a new design file.
2. Create a frame and add the heading Mobile Network Handoff Process.
3. Draw two cells using circles to represent the coverage areas of two base stations.
4. Place BTS 1 in the first cell and BTS 2 in the second cell.
5. Add a mobile phone icon inside the first cell.
6. Draw an arrow showing the mobile phone moving from Cell 1 to Cell 2.
7. Add labels for the handoff steps:
    - Mobile connected to BTS 1.
    - Signal strength from BTS 1 decreases.
    - Network identifies BTS 2 as a suitable target.
    - Connection transfers to BTS 2.
    - Call continues without interruption.
8. Use different colours to highlight the old and new connections.
9. Open the Prototype tab and connect frames to demonstrate each handoff stage.
10. Click Present to test the simulation.

4. Output

The output illustrates how a mobile device transfers its active connection from one base station to another as it moves between cell coverage areas.

5. Result

Thus, a mobile network handoff scenario was visualized using Figma, showing signal measurement, target cell selection and connection transfer.
