EXPERIMENT NO:09

Experiment 9: GSM Service UI Prototype Using Figma

1. Aim

To develop a user interface prototype for a GSM (Global System for Mobile Communications) service using Figma.

2. Requirements

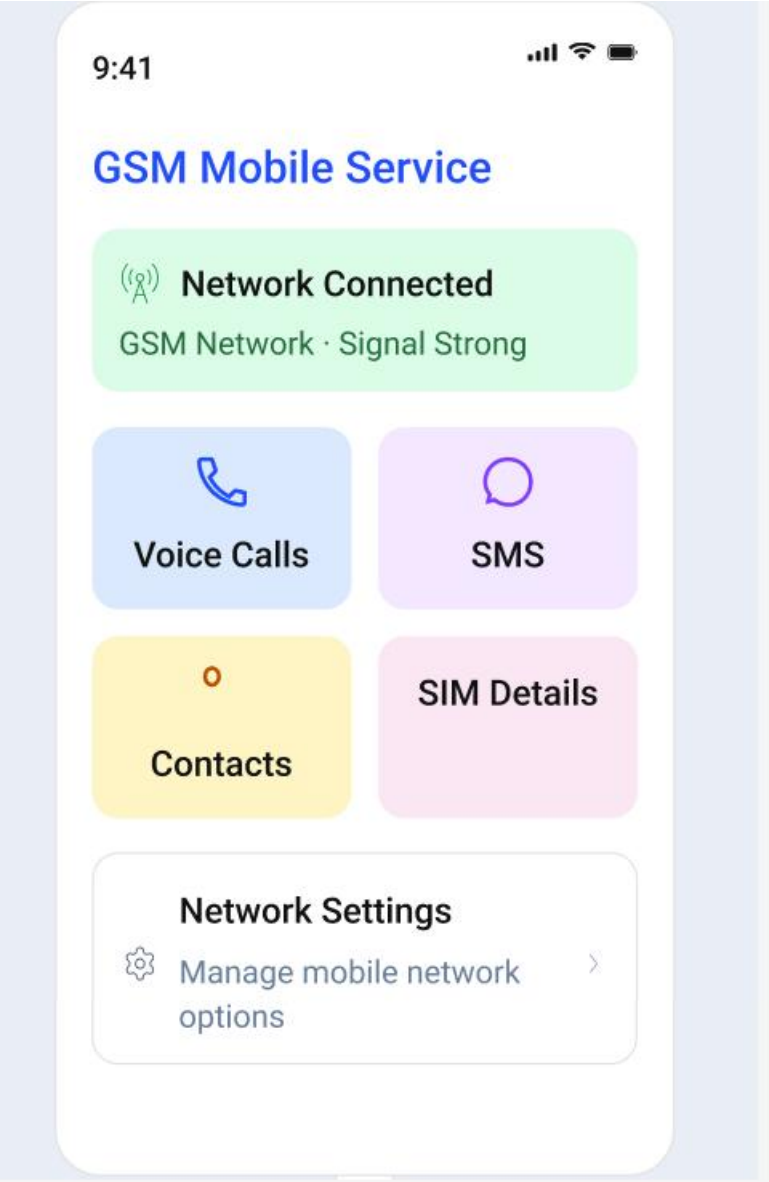

- Figma
- Web browser
- Internet connection

3. Procedure

1. Open Figma.
2. Click New Design File.
3. Press F and select a mobile phone frame.
4. Add the heading GSM Mobile Service.
5. Create sections for:
    - Network signal strength
    - Voice calls
    - SMS messages
    - Contacts
    - SIM information
    - Network settings
6. Add suitable icons and buttons.
7. Use different colours to make the interface attractive.
8. Open the Prototype tab and connect buttons to other frames.
9. Click Present to test the prototype.

4. Output

A GSM service interface displaying network connectivity, voice calls, SMS, contacts, SIM information and network settings.

5. Result

Thus, a user interface prototype for a GSM service was designed using Figma.
