EXPERIMENT NO:11

Experiment 11: Secure Mobile Application Wireframe Using Figma

1. Aim

To design a wireframe for a mobile application that incorporates security measures using Figma.

2. Requirements

- Figma
- Web browser
- Internet connection

3. Procedure

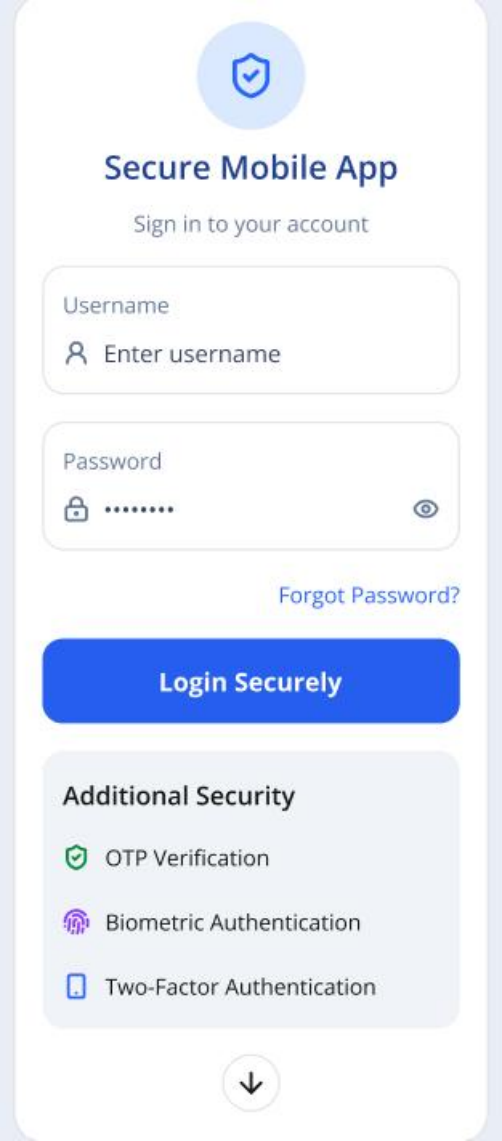

1. Open Figma.
2. Create a new design file and select a mobile frame using the Frame tool (F).
3. Add the heading Secure Mobile App.
4. Create input fields for username and password.
5. Add a Login button and a Forgot Password link.
6. Add security features such as OTP verification, biometric authentication and two-factor authentication.
7. Use a lock icon to indicate secure access.
8. Design a second screen for OTP verification.
9. Connect the screens using the Prototype tab.
10. Click Present to test the prototype.

4. Output

A secure mobile application login wireframe containing username, password, login, OTP verification and biometric authentication options.

5. Result

Thus, a mobile application wireframe incorporating security measures was designed using Figma.
