EXPERIMENT NO:04

Experiment 4: Mobile Network Protocol Stack Using Figma

1. Aim

To create a visual representation in Figma highlighting the key elements of mobile network protocol stacks.

2. Requirements

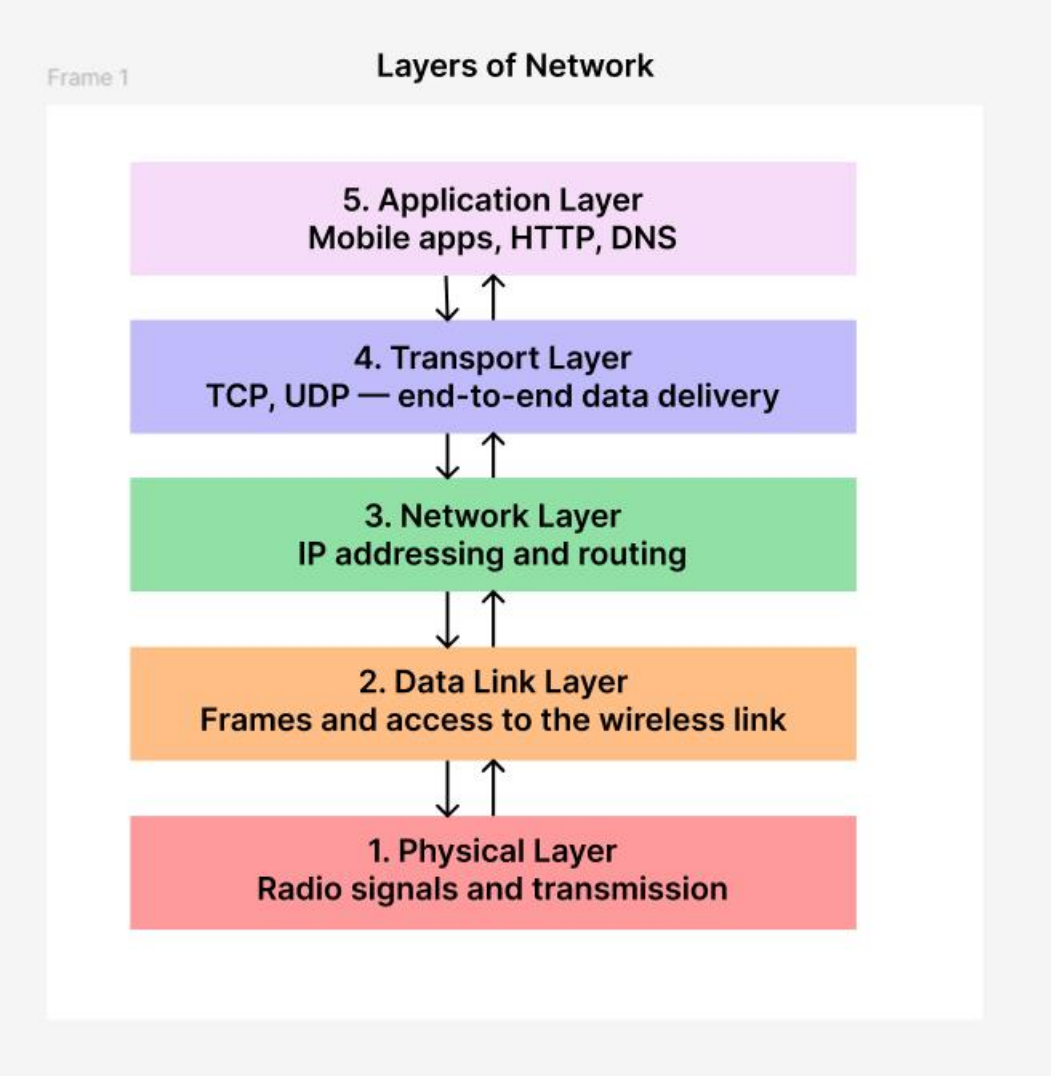

- Figma
- Web browser
- Internet connection

3. Procedure

1. Open Figma and create a new design file.
2. Create a frame using the Frame tool (F).
3. Add the heading Mobile Network Protocol Stack.
4. Create five horizontal rectangles representing the protocol layers.
5. Label the layers as follows:
    - Application Layer
    - Transport Layer
    - Network Layer
    - Data Link Layer
    - Physical Layer
6. Add a short description of each layer inside its rectangle.
7. Use different colours to distinguish the layers.
8. Add arrows to indicate how data moves through the layers.
9. Click Present to view the completed design.

4. Output

The output is a layered diagram explaining the roles of the application, transport, network, data link and physical layers in mobile communication.

5. Result

Thus, a visual representation of the key elements of a mobile network protocol stack was created using Figma.
